## Key Projects

### WithU- Liver Health Monitoring Platform

Team Leader & Front-End Developer | Graduation Project - Excellent Grade (High Distinction)

An innovative healthcare web platform helping Hepatitis C patients track their treatment journey.

- Built interactive dashboard for uploading medical reports and viewing AI-generated health insights
- Implemented automated follow-up reminders and comparative analysis of test results over time
- Led a team of developers and coordinated with AI/ML team for seamless backend integration

Tech Stack: React.js, Tailwind CSS, Zod, Framer Motion

### TrendShop – E-Commerce Platform

Front-End Developer | Ongoing Development

Fully functional e-commerce website with modern user experience.

- Shopping cart, product filtering, search, wishlist, and user authentication
- applying i18n multiple languages (en/ar)
- Responsive design across all devices with focus on performance and accessibility Tech Stack: Next.js, typescript, JavaScript, Tailwind CSS, Context API / Redux

## Skills

### Soft Skills

Team Leadership Problem Solving  
Communication Time Management

### Technical Skills

HTML5 CSS3 JavaScript (ES6+) TypeScript  
React.js Next.js 16 Tailwind CSS Git &  
GitHub Responsive Design UI/UX Principles.  
Performance Optimization REST APIs Figma  
(Basics) Vercel Clean Code

### DevEvents Next.js 16

A modern event management web platform allowing users to browse, explore, and register for tech events.

- Built dynamic homepage listing upcoming events with real-time API integration
- Implemented CRUD functionality for events using Next.js API routes
- Developed dynamic event pages with detailed info and related event suggestions
- Integrated image upload with Cloudinary and analytics tracking with PostHog
- Focused on responsive design, clean code, and performance optimization

Tech Stack: Next.js 16, React.js, Cloudinary, PostHog, CSS Modules, typescript

### WorldWide App

Front-End Developer | WorldWide - Personal Project  
A geography-focused web platform enabling users to explore countries, capitals, and global statistics.

- Built search and filter functionality for country data fetched from RESTAPIS
- Designed responsive UI with interactive cards and detailed country information
- Ensured clean code structure and smooth user experience

Tech Stack: React.js, Fetch API, React Router, CSS Modules

### React Quiz App

Front-End Developer | React Quiz App - Personal Project

An interactive quiz web application allowing users to test their knowledge across multiple topics.

- Developed dynamic quiz functionality with question randomization and scoring system
- Implemented responsive design and user- friendly navigation
- Managed application state and user progress using React Hooks and Context API

Tech Stack: React.js, Context API, CSS Modules, JavaScript

### Popcorn Movie App

An interactive movie web platform allowing users to search, explore, and view detailed information about films.

- Built dynamic search functionality and movie detail pages with real-time API integration
- Implemented responsive UI with smooth navigation and state management via Context API
- Focused on clean, maintainable code and engaging user experience

Tech Stack: React.js, React Router, Context API, CSS Modules
